PROFESSIONAL SUMMARY

Final-year CS student at Amrita Vishwa Vidyapeetham and Product Management Intern at EY. Good at breaking down messy user problems into clear PRDs, running experiments, and working across engineering and design teams to ship features. Technical background in full-stack and mobile development (Flutter, Next.js, FastAPI). Backed by 2 published papers (ICCNT 2025), 2 hackathon wins (OLabs, NASA), and daily use of AI tools (ChatGPT, Claude, Gemini) for research and wireframing.

EDUCATION

B.Tech, Computer Science and Engineering - Amrita Vishwa Vidyapeetham
Kollam, India

2022 - 2026

CORE COMPETENCIES

Product Requirement Documents (PRDs)

Stakeholder Management

Customer Feedback Analysis

Data Validation

Problem Solving

AI-Assisted Working

Feature Prioritization

Product Roadmaps

Experimentation

Wireframing

Cross-functional Collaboration

Documentation

WORK EXPERIENCE

Product Management Intern - EY (Ernst and Young)

Feb 2026 - Present

Hyderabad, India

- Collect and analyze customer feedback from app reviews and user research to identify pain points on Aditya Birla digital products used by millions of users.
- Translate user insights into detailed Product Requirement Documents (PRDs), orchestrator flows, and user stories for engineering and design teams.
- Define product roadmaps and prioritize features based on data validation and severity of issues across martech digital products.
- Coordinate stakeholder management across engineering, design, and business teams to drive feature development and monitor product performance.

Flutter Developer Intern - Capovex Research and Analytics Pvt. Ltd.

Jan 2025 - Jul 2025

Remote, India

- Developed cross-platform mobile apps using Flutter, collaborating with cross-functional teams including AI/ML engineers and designers.
- Managed product tasks using Jira for efficient development workflows and rapid experimentation cycles.
- Designed backend solutions and integrated real-time APIs for data synchronization across iOS and Android.

PROJECTS

DecisionLog - Decision Tracking and Analytics Platform

2026

- Built a full-stack decision platform (Next.js 14 + FastAPI + SQLite) with JWT auth, team workspaces, real-time chat, SVG whiteboard, and Dockerized deployment.
- Implemented decision CRUD, tagging, voting (Approve/Reject/Abstain), threaded comments, AI chatbot, and analytics dashboards via REST API.

Zomato Data Analysis - Consumer Market Research

2025

- Analyzed Zomato restaurant dataset using Python, Pandas, Matplotlib, and Seaborn to identify best restaurant type, location, and service model.
- Performed data cleaning (deduplication, null handling, type casting, clustering) and built countplots, boxplots, and barplots to surface patterns.

MediMatch AI - AI-Powered Medicine Assistant App

2025

- Built a Flutter app with OCR + handwriting prescription scanning, Gemini 1.5 Flash for generic alternatives and drug interaction checks, and 5-language support (English, Telugu, Hindi, Tamil, Malayalam).
- Implemented Firebase auth, real-time chat, medicine donation, nearby pharmacy finder (GPS + Maps), medication reminders, and offline storage (Hive).

ACHIEVEMENTS

- Winner, OLABS National Hackathon 2025 (among 194 teams) | Best Engineering Solution, NASA Space Apps Challenge 2024 (nominated for Global round).
- Published 2 research papers at ICCNT 2025: Cross-Platform User Identification (87% F1-score), Multi-Modal Phishing Detection (94.2% accuracy).

SKILLS

Product and Tools: Jira, Notion, Wireframing, PRDs, Roadmap Planning, Data Analytics, User Research

AI-Assisted Working: ChatGPT, Claude, Gemini AI, Prompt Engineering

Development: Java, Python, Dart, JavaScript, Flutter, FastAPI, Spring Boot, Angular, Node.js

Cloud and Databases: GCP, Cloud Run, SQL, Firebase, MongoDB

Languages: English, Telugu, Hindi
